Sir,

I am a regular commuter to your stores in Jaipur and Udaipur. Recently I purchased 3 trousers and found two problems-
1. In cotton trousers you put leather-made brand logo on the top of right hip pocket, which is burnt during ironing and the whole area is destroyed by it. In some trousers it is made of steel that is ok.
2. You do not give a small inside pocket on front side, it is usually known as "chor-jeb" Actually it is needed to put car or bike keys.

Please look into the matter and make modifications.

S.K.Kataria, 9929155426
